

# Reliable drive solutions for greenhouses

With 70+ years of expertise, we empower the horticulture industry with reliable & accurate drive solutions. Our systems combine Dutch engineering, reliability, and innovation to support growers and greenhouse builders.

Whether it's glass or poly greenhouses, Ridder drive systems ensure reliable control for successful growing. By precisely and reliably managing ventilation, screening, and winching, we help achieve optimal crop performance.

## Why choose Ridder drive systems?

**Global market leadership** Ridder is the trusted global leader in greenhouse drive technology, providing proven solutions to growers and installers worldwide for over 70+ years.

**Accurate control** Ridder drive systems precisely manage vents, screens and sidewalls to maintain an optimal greenhouse climate.

**Reliability** Built on 70+ years of Dutch engineering excellence, our drive systems perform consistently, even under demanding conditions.

**Minimal maintenance** Engineered for lasting performance, Ridder drive systems require minimal upkeep, saving valuable time and resources.

“With over 70+ years of experience we are the market leader for reliable and accurate drive systems.”

# Ridder drive systems

## Ventilation

Ridder's ventilation drives give you accurate control over roof vents and side windows, maintaining an ideal greenhouse climate.

## Screening

Ridder's screening drives move greenhouse screens smoothly and precisely to manage light, temperature, and energy consumption.

## Winching

Ridder's winching drives offer simple, effective solution for hoisting gutters, heating pipes or grow lights in greenhouses.

## Ridder SmartDrive

The Ridder SmartDrive sets a new standard in greenhouse motorization. Designed for installers and tailored to the needs of growers, it simplifies the time consuming installation process by 75% and ensures accurate, reliable and energy efficient climate control all year round.

# 75%

Faster installation
